

Heating Your Home Safely

Did you know?

Home fires occur more in the winter months than any other time of the year.

Follow these heating tips to help prevent winter fires and to stay safe this winter season:

- Keep anything that can burn at least 3 feet from all heat sources including fireplaces, wood stoves, radiators, space heaters or candles.
- Never use an oven to heat your home.
- Turn space heaters off when leaving the room or going to bed.
- Maintain heating equipment and chimneys by having them cleaned and inspected each year by a professional.
